

## **Overclaiming Students in Roster Verification**

by [Curtis Sonneman](#) - Tuesday, 14 May 2013, 02:59 PM

We have received several calls concerning overclaiming of students in Roster Verification. This is likely due to the loading of the fall semester student data and providing the capability to search for students across districts. Principals and staff are spending large amounts of time trying to track down staff at other schools to resolve the overclaiming.

To address this problem, we ask you to share with your district testing coordinators, accountability directors, and principals to make sure the students within each school are correctly reported and work to eliminate any overclaiming of students at their school.

**Principals and district administrators do not need to continue working to resolve the overclaiming flags resulting from a student being overclaimed across schools. We will address any overclaiming across schools through the membership analysis process.**

We appreciate your continued support and patience!
